## Technical Excellence for the Healthcare Sector

### Unrivalled Heritage in Flooring and Sterile Wall Systems

At Tremco illbruck, we have over 80 years of experience solving problems within the building and construction industries. Using state of the art technology, Tremco illbruck lead the field in providing support in the design and specification of floors and walls within the healthcare sector.

### Working with Hospitals and Healthcare Facilities Across the UK

Tremco illbruck have extensive experience of working with hospitals and healthcare facilities across the country. PFI and Procure 21 schemes have been successfully completed alongside traditionally specified and funded projects.

Liquid damp proof membranes, premium underlayments, decorative resins and low voc adhesives systems for high performance resilient

flooring provide the specifier with comprehensive options for the creation of a first class flooring installation.

Tremco illbruck's specialist coatings for sterile and clean zone environments complete the package for the healthcare design professional. The range conforms to appropriate specifications such as htm 61 and htm 69, and contains products which inhibit the growth of micro-organisms such as mrsa and which do not support the spread of flame.

## Solvent free and sustainable systems for a healthier environment

## Full Service Expertise for Sterile & Clean Zone Environments

### For Your Total Peace of Mind

Tremco illbruck understands floors and walls. Even more importantly, we understand the concerns and needs of building owners and managers.

We recognise their desire to achieve total peace of mind about the integrity and condition of their asset. We also acknowledge their need to ensure that they avoid the costly pitfalls of poor design, inadequate workmanship or inferior, short-life products.

Tremco illbruck provides much more than just products, we provide a start-to-finish service.

### The Complete Solution

Tremco systems are designed to give you a complete solution including:

- thorough investigation, analysis and expert diagnosis
- tailored, guaranteed long-term solutions
- experienced assistance with project implementation
- extended service life for your floors and walls
- minimal disruption to normal building use during renovation
- reduced long-term maintenance costs
- single point warranty

### High Performance Products

Tremco systems for sterile and clean zone environments are second to none, covering the full range of needs.

## Effective Surfaces Delivered with Superior Technology

### Walls & Ceilings

- **Tretoplast WB**  
An MRSA resistant, ready-to-use, tough elastomeric coating system, formulated to provide effective protection from mould and bacteria in aseptically and other sensitive areas.
- **Wall Guard**  
An MRSA and e-coli resistant, durable decorative coating which contains triclosan to give excellent antibacterial and antifungal performance. It is suitable for use on walls and ceiling areas in laundries, kitchens, washrooms and other areas subjected to repeated cleaning. Will not contribute to the spread of flame in the event of a fire.
- **Soffiguard**  
Soffiguard is a water based flexible coating system, with some sterile properties and achieves a class 'O' spread of flame. It is formulated to provide effective protection to plaster and masonry in non-aseptic areas (eg. Corridors, waiting rooms and other public areas).

### Floors

#### Damp Proof Membranes

A range of liquid applied surface damp proof membranes offering standard to ultra fast curing rates.

- Treadfast ES 3000
- Treadfast One Coat Universal
- Treadfast Fastrak Universal

#### Smoothing Compounds

A range of high performance smoothing and self levelling compounds offering premium compressive strengths and application properties. Independently accredited to HTM 61 or formulated to be low odour and completely protein free.

- Treadfast Unitex
- Treadfast Uniflow
- Treadfast Unismooth
- Treadfast Unispec Sx-1

#### Decorative Resins

A range of hygienic finishing resins, dust free and cleanable, incorporating proven epoxy technology alongside state-of-the-art rapid cure methacrylate systems.

- Epoxy SL
- Epoxicote
- Rapide

#### Adhesive Systems

Tremco illbruck manufacture a comprehensive range of specialist low VOC adhesives designed for the installation of resilient and textile floors.

**Tremco systems are designed to establish or restore the performance and appearance of your floors, walls and ceilings - ensuring a long working life, fit for the purpose intended.**

*" Tremco systems have consistently met the high standards demanded for Christie Hospital projects."*

## Over 80 Years Experience

This unrivalled service is the result of a continuous programme of development - and application experience - spanning over 80 years.

Over this period, Tremco illbruck has been a leading supplier of coating, adhesive and membrane solutions for contract, commercial and industrial applications.

Tremco systems are easy to apply and deliver consistent, long-lasting performance. The company's innovative problem solving philosophy, combined with our site survey and evaluation service, enable us to provide tailor-made solutions to fulfil your requirements - without compromise.

## Technical Services

Tremco illbruck offers expert advice and design guidance at every stage of a project, from initial survey to planned maintenance.

## Why Tremco illbruck Deserves Your Confidence

Tremco illbruck is unique. No other company brings greater insight or expertise to flooring and sterile coating systems. We have invested heavily in research and development, with new laboratories established to develop and prove the technology for even better solutions.

Above all, tremco systems provide informed solutions - and first class results - which represent best possible value.
