

# First Choice Hotel

Bristol

## Tremproof 250 GC

- Cold-applied fully bonded membrane
- Highly elastomeric - excellent crack bridging performance
- Rapid curing - can be overlaid in as little as 4 hours

### APPLICATION

Suspended concrete slab above hotel basement car park

### SURFACE

Block paving

### SPECIFICATION

Tremproof 250 GC-SL @ 2 kg/m<sup>2</sup>  
Tremproof 250 GC-T  
Tremco Dualflex  
Tremco VCL3

### CONTRACTOR

Cemplas

### AREA

300 m<sup>2</sup>

### PROJECT DESCRIPTION

As part of a new build hotel development in Bristol city centre, waterproofing specialist CETCO were contracted to waterproof two podium decks over a covered parking area.

As part of the critical path within the site, CETCO required a fast track waterproofing system that would adhere to the recently poured concrete deck. Tremproof 250 GC was ideally suited to the installation. The single component, liquid-applied membrane has excellent adhesion to green or damp concrete, and cures to form a highly elastomeric membrane.

Once installed, the cured membrane was covered with Tremco VCL 3 Protection Course, to secure the installed membrane from second-comer damage for the duration of the project.
