Tremco Industrial Flooring Systems

Floor Screeds

Treadfast Uniflow

Treadfast Uniflow is a high performance cementitious self smoothing compound, based on the latest in cement and polymer technology. Mixed with water, a highly fluid, fast setting compound is produced which is suitable for use in industrial environments, giving a very hard wearing floor. Typically applied at 5 mm to 10 mm thickness.

- Suitable for:
- Warehouses
 - Dry production areas
 - Full fork-lift traffic

Epoxy SL

Epoxy SL is a high performance epoxy resin flooring system, typically applied at 2-3 mm thick. This provides a hygienic, dust free floor with excellent mechanical and chemical resistance.

- Suitable for:
- Warehouses
 - Production areas
 - Full fork-lift traffic
 - Laboratories
 - Clean rooms
 - Plant rooms

Monoflor ST

Monoflor ST is a high performance polyurethane floor screed for industrial and commercial environments where resistance to chemical spillage and regular washing is a requirement. This product has a lightly profiled non-slip matt texture, and can be steam cleaned when applied with a thickness of 9 mm. A coving grade, Monoflor Coving, is available.

- Suitable for:
- Food and drink production areas
 - Laboratories
 - Clean rooms
 - Chemical exposure
 - Constantly wet areas
 - Full fork-lift traffic

Pourable Industrial Flooring

Pourable Industrial Flooring is a low cost, high strength, industrial floor levelling compound, suitable for internal and external applications. It is ideal for providing smooth but slip resistant surfaces where the concrete has a tamped rough finish or where excessive wear has taken place and is particularly suited in wet environments.

- Suitable for:
- External concrete, small to medium size projects, warehouses.

Floor Repairs - Floor Screed - Floor Coatings

Floor Coatings

Epoxicote

Epoxicote is a heavy duty epoxy resin floor sealer which provides a high build, thickly applied solvent free coating with excellent wear and acid resistance. A slip resistant aggregate can be supplied (called Tremco Epoxicote Aggregate) for wet or oily areas.

- Suitable for:
- Warehouses
 - Chemical plants
 - Aviation
 - Electronics & Engineering
 - Pharmaceutical production areas
 - Food production premises

Epoxy Dustproofer WD

Epoxy Dustproofer WD provides an economical and effective answer to this problem, providing a durable finish that is attractive and readily cleaned. Tremco Epoxy Dustproofer WD is water based, solvent free, non-tainting and has a low odour. The product has a sheen finish.

- Suitable for:
- Food production areas
 - Electronics factories
 - Warehouses
 - Engineering premises
 - Manufacturing plants

Surefoot

Surefoot is a lightly textured, epoxy resin roller-applied coating which greatly increases grip for pedestrians and vehicles. Chemical resistance is good and the tough epoxy resin ensures durability with an attractive matt finish. The aggregate is already mixed into the coating, which gives a more even texture than can normally be achieved by other products.

- Suitable for:
- Food and drink production areas
 - Laboratories
 - Constantly wet areas
 - Full fork-lift traffic

Steam Cleanable Coating

Steam Cleanable Coating is a solvent free, two part epoxy resin that will resist high in-service temperatures and steam cleaning.

- Suitable for:
- Food preparation and production areas.
 - Vehicle workshops where hot tyres may cause normal epoxy coatings to soften

General Products

Pavseel

Pavseel solvent free, penetrates deep porous concrete and hardens to provide a dustproofed surface. It can also assist with stabilising jointing sand, or to protect the integrity of block paving. Pavseel has a variety of uses including most industrial floors including warehouses, machine shops, etc., and for block paving on footpaths, pedestrian precincts, domestic driveways, office car parks, retail parks and highways.

Tremco Epoxy Mortars

Epoxy Mortar - Rapid Set is a resin rich blend of specially selected finely graded aggregate and epoxy resin. Ideal for fast-track repairs of heavy-duty industrial areas. Can be opened to heavy traffic after just 3 hours.

Epoxy Mortar - Deep Fill is an aggregate reinforced repair mortar for deep section repairs on industrial floors.

F4 Resin Emulsion

F4 Resin Emulsion provides extremely hard wearing, impact resistant seamless flooring. When the F4 Resin Emulsion is mixed with sand, cement and granite, it outperforms conventional concrete, granolithic and other seamless flooring systems, typically laid at 12 mm thickness. Suitable for: constantly wet areas, food factories, heavy engineering, can be used to create falls on floors.

Tremco Degreaser

Tremco Degreaser is a high performance emulsifying degreasant that replaces the traditional solvent based products. It contains no solvents or other chemicals that are dangerous for the environment. Tremco Degreaser has been specially formulated to remove oil and grease from concrete and other masonry type floors.
