

# illbruck PU700 Masonry Adhesive

Taking the Work out of Blockwork

# illbruck PU700 Masonry Adhesive

## Rapid Bonding Adhesive for Stone and Blockwork

illbruck PU700 is a rapid curing PU foam adhesive developed specifically for the installation of brick, stone, blocks and a range of other construction materials.

Clean, quick and easy to apply, illbruck PU700 offers a real alternative to traditional mortar. The adhesive cures rapidly to form a high strength bond, and is equally suitable for internal and external use. It has excellent long-term resistance to water, dilute acids and alkaline solutions.

Compatible with a wide variety of construction materials, the range of possible applications continues to grow. illbruck PU700 really does take the work out of blockwork.

### Ideal for bonding and setting of:

- Brickwork
- Breeze Blocks
- Natural Stone
- Gypsum Block
- Aerated Concrete
- Granite
- Flagstones
- Tiles / Slates
- Timber

### No mixing...

No need to spend time mixing sand and cement. Simply screw the canister onto the handheld gun and PU700 is ready to use.

### No water...

A 25 kg bag of mortar takes more than 8 litres of water to mix. With PU700 all components are inside the single handheld canister.

### No power...

illbruck PU700 does not require batteries, extension leads or generators. All our foams use completely CFC-free propellants.

### No mess...

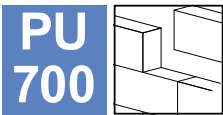

The easy-to-use applicator provides accurate control, ensuring that you only apply adhesive where you need it.

### No waste...

illbruck PU700 allows you to only use what you need. After use, the canister can be left on the gun for future applications.

“...it takes seconds to apply, and sets within minutes. This is the first real alternative to mortar.”

## Simple 2-Step Application

### Step 1:

To begin, screw the canister onto the applicator gun. Apply a bead of foam by pulling the trigger on the gun.

### Step 2:

Place the next block into position and bring together to make the joint. PU700 cures within 10 -15 minutes, and is fully load bearing within 24 hours.

# 25 kg

A single canister of illbruck PU700 can replace a 25 kg bag of traditional mortar.
