Tremproof 250 GC-SL @ 2 kg/m²
Tremproof 250 GC-T detailing
Tremco Dualflex
Tremco VCL 3 Protection Course

CONTRACTOR

CETCO

AREA

250 m²

PROJECT DESCRIPTION

A private heritage restoration has utilised Tremco illbruck's Tremproof 250 GC waterproofing system on a luxurious wrap-around balcony deck. With panoramic views across Lancashire, the deck area was part of the major restoration project under a tight time schedule.

Specialist contractor CETCO was recruited to install the waterproofing system. With the project initially delayed due to bad weather, and then associated disruption from other trades, CETCO required a system that could be quickly installed and then forgotten about. Tremproof 250 GC was selected due to its excellent adhesion to green or damp concrete, and ease of use. Once installed, the cured membrane was covered with Tremco VCL 3 Protection Course, to secure the installed membrane from any second-comer damage.
